Relevant Experience

Front End Engineer Qarhami Remote Base

June 2024 — Present

Converted Figma designs into fully responsive React.js 18 interfaces using Material UI and Tailwind CSS for modern, mobile-friendly UIs. Developed a GPS-based vehicle tracking application featuring real-time data updates, interactive dashboards, and offline access using Progressive Web App (PWA) technology. Integrated Google Maps API with custom markers and location tracking for real-time asset visualization and route plotting. Implemented dynamic routing and integrated location-based APIs for accurate, real-time asset tracking and enhanced user navigation. Optimized performance and load times by implementing lazy loading, code splitting, and efficient state management with React hooks. Collaborated with backend developers to design RESTful APIs and ensure seamless integration of data flow and authentication.

Web Developer, Iqra University Main Campus Karachi

Apr 2024 — June 2024

Managed Iqra University's main website and Alumni Portal, enhancing overall functionality, responsiveness, and user experience across devices. Developed and maintained dynamic pages using WordPress, HTML, CSS, JavaScript, and MySQL to ensure seamless frontend-backend integration. Collaborated closely with the IT department to align website features with university goals and branding standards. Optimized site performance through database tuning, image compression, and code refactoring, resulting in faster load times and improved SEO. Maintained site security and performed regular updates, backups, and monitoring to ensure uptime and data protection.

Frontend Developer, Granule Services

Feb 2023 — May 2024

Created responsive websites for marketing agencies by converting Figma designs into pixel-perfect, functional layouts using HTML, CSS, and JavaScript. Optimized user experience and website performance through clean code, responsive design practices, and lightweight assets for faster load times. Collaborated closely with designers and project managers to ensure brand consistency and meet tight client deadlines. Integrated third-party libraries and tools to enhance site interactivity, including sliders, form validation, and animations.

Full Stack Developer, Futurifysoft

Mar 2025 — Present

Developing and maintaining multiple products as a Full Stack Developer, building new features and resolving bugs across the stack using modern web technologies.

Certifications

March 6, 2021 — December 16, 2021

Web Development Level 3 – MUET March 6, 2021 – December 16, 2021
Web Designing – Kamyab Jawan Program, Green Valley Institute November 2019 – June 2020
React.js – Coursera Online April 7, 2023 – June 9, 2023

Interests

Converting designs into pixel-perfect React apps, creating responsive and user-friendly interfaces, exploring frontend technologies, and building modern web experiences.

Web Skills

HTML5
CSS3
Tailwind CSS
MUI v6 (Material UI)
JavaScript (ES6+)
React.js
TypeScript + Next.js
Hooks, Context API, Zustand
Material-UI Ant Design
Responsive & Mobile-First Design
Pixel-Perfect Dashboard & Web UI
REST & GraphQL API Integration
(PWA & Web Performance)

Tools & Platforms

Git, GitHub & GitHub Copilot, Netlify
Vercel (Edge Deployment)
Postman, Figma, Firebase, Algolia,
Mapbox GL JS, WebSockets, AI
Integration, Node.js, Exp, MongoDB
AWS Deployment

Education

Bachelor of Science in Software
Engineering
Merhan University of Engineering &
Technology, Jamshoro
2017 – 2021

Completed Projects

app.qarhami.com

Developed a rental and GPS tracking system that streamlines bookings, vehicle usage, and management, improving efficiency and user experience

iqra.edu.pk

Managed Iqra University's website and Alumni Portal, enhancing functionality, mobile responsiveness, and user experience using WordPress, custom code, and MySQL.

socialendpoint.com

Built responsive marketing websites from Figma designs with clean code and modern UX.

rozedhani.org

Built a responsive nonprofit website with donation, project, and volunteer features for Rozedhani.org
